Profile

Motivated aspiring engineer and self-driven programmer with strong fundamentals in frontend web development. Actively balancing academic preparation with hands-on project building to develop real-world technical skills.

Technical Skills

HTML | CSS | JavaScript | Python

Projects & Practical Experience

- Designed and developed responsive blog websites
- Built file listing and download-based web pages
- Created JavaScript-powered interactive UI components
- Developed Python scripts for automation and logical processing

Tools & Platforms

GitHub | GitHub Pages | VS Code | Browser DevTools

Education & Academic Preparation

- Completed 12th Grade (Science Stream)
- Actively preparing for Engineering Entrance Examinations (JEE, MHT-CET)
- Parallel focus on programming, web development, and practical skill building
